*Failure to follow these warnings and the assembly instructions could result in serious injury or death.*

DO NOT use this crib if you cannot exactly follow the accompanying instructions.

*To reduce the risk of SIDS, pediatricians recommend healthy infants be placed on their backs to sleep, unless otherwise advised by your physician.*

*Strangulation Hazard: STRINGS CAN CAUSE STRANGULATION! Do not place items with a string around a child's neck, such as hood strings or pacifier cords. Do not suspend strings over a crib or attach strings to toys.*

*Strangulation Hazard: To help prevent strangulation tighten all fasteners. A child can trap parts of the body or clothing on loose fasteners.*

*Fall Hazard: When child is able to pull to a standing position, set mattress to lowest position and remove bumper pads, large toys and other objects that could serve as steps for climbing out. This crib has an adjustable mattress support. For the convenience of the parent when the baby is very small, the mattress support may be used in the highest position. Important: with the mattress support and mattress in the highest position, be absolutely sure that the top of the front crib side is at least 3 inches higher than the top surface of the mattress. If it is not, lower the mattress support and the mattress to the next highest position.*

*Fall Hazard: Stop using crib when child begins to climb out or reaches a height of 35in. (89cm), whichever occurs first. The child should be placed in a youth or regular bed.*

*Check this product for damaged hardware, loose joints, loose bolts or other fasteners, missing parts, or sharp edges before and after assembly and frequently during use. Securely tighten loose bolts and other fasteners. Do not use crib if any parts are missing, damaged or broken. Contact C&T International Inc. for replacement parts and instructional literature if needed. Do not substitute parts.*

*Follow warnings on all products in a crib.*

*If refinishing, use a non-toxic finish specified for children's products.*

*Never use plastic shipping bags or other plastic film as mattress covers because they can cause suffocation.*

*Infants can suffocate in gaps between crib sides and a mattress that is too small.*

*Ensure a safe environment for the child by checking regularly, before placing the child in the crib, that every component is properly and securely in place.*
